

August 5, 2009

I finally think I have one of my cameras working and then I left it in the boat when we went to clean fish.... The fish are starting to show up in better numbers. We ended up with 7 this morning and missed a few others. We had a good first bite but when it was over we might as well just went home. We didn't have a bite during the last 2 hours of our trip. Our best rods were a Moonshine Flounder Pounder 115 down and a big white hootch 135 down. Wire divers also took hits 225 and 250 back with a blue Spin Dr and KRW Riverside fly.
