

July 20, 2010

We had another great day out on the lake. It was foggy coming across Manistee Lake but the big lake was clear. Fishing was a little slow early but picked up as the morning went on. The weather could not have been nicer. We ended up with nine nice fish and missed a few others. No one thing was really working and we just picked away taking fish on riggers, divers, core and copper. Our best action was out deeper.
