

How Long is a Charter?

Half day charters are our most popular trips and last 6 hours from dock to dock or limit. Full day charters are 9 hours from dock to dock or limit. "Dock to dock" means from the time we are scheduled to leave the dock until the time we return to our dock. "Or limit" means the charter will end early if we reach the legal limit of our customers. The Michigan limit is five fish per person. Departure times vary through the season to coincide with sunrise and sunset. The Captain will notify you of departure time when the trip is booked.
