

## June 19, 2007 Report

Another great day on Lake Michigan fishing from Manistee! The lake was flat all morning and bigger Kings have moved into the area. Riggers 60 - 90 down, wire divers back 135 - 150 and full cores were all good. Ended up with 9 nice fish plus a couple shakers. My probe wasn't working so I can't report much on temp. Didn't mark much, just picked one here and one there but it added up to a nice box by the end of our 1/2 day charter. 1 Coho and the rest were Kings. No steelhead or lakers today. A friend loaned me some spare parts and I think we have the probe working again. Give us a call if you are interested in getting out on the lake. The fishing has been great so far this season. I have several weekdays open as well as a few weekends. Open dates include June 30, July 14 and July 15.
