

## July 28, 2007 Report

Overall fishing has remained good this past week. Some days have been better than others. Yesterday's north blow scattered the fish today. The fish that were around were in tight pockets but boat traffic made it tough to keep turning on them. The early bite has been up high in the warmer water. 3, 5 and 10 colors of leadcore have been good. Also taking fish on the riggers between 30 and 70 down. Low drivers set short have been hot first thing in the morning. Ultra glow spoons early, hootchies and spoons have all been taking fish.
