

## Saturday, August 11, 2007 Report

Got a late start today and missed first bite. We had to work for them but still managed a good box with 11 nice fish (one hidden in photo). Took a couple fish on plugs off the riggers 50 and 60 down then rode for quite a while. We eventually found a spot that was still holding some active fish and worked that for the rest of the morning. KRW Aquagold on a big hootch was good on a 70 foot rigger and a low diver back 140. Leadcore took quite a few fish - both 5 and 10 colors. In addition to several nice kings we took a lake trout, a steelhead, and a coho.
