

August 22, 2007 Report

Fishing remains great here in Manistee. There are lots of fish being taken in the harbor and on the beach. We have been avoiding the boat traffic in the shallow water and fishing out on the shelf. There are still good numbers of Kings and Coho out there. A lot of boats fished the shallow water today so traffic was very light out on the self. Everything was working including hey baby on five colors, NBK on ten colors, plugs off the riggers, and Hootchies and KRW flies on the divers. The inside marker is missing from the net in the 14's so keep that in mind if you are fishing out of your own boat.
