The boat is scheduled to be pulled next week. I'll be glad to have it tucked away for the winter but am always sad to see the season end. As I said in my last post, we had a another great year with LOTS of fish and wonderful customers.

I stopped at the weir a couple days ago and saw something that surprised me. Of the 10,000 plus Kings harvested on the Little Manistee, the largest so far was a 19 pounder. This confirms our findings this season that while the Kings were plentiful they were running smaller. All the same, I am still surprised that they didn't have a few 20 pounders come through the weir.
