

August 1, 2008 Update

Had another nice day out on the lake with a great group of guys. Ended up 9 for 12 or 13. We had a great early bite. The first rod that I set went off before I could set the second. Set the next rod and it went off before for I could get to the next. That went on for the first 4 fish. We picked away after that and ended up with a nice box of fish. Plugs and Hootchies pulling KRW AquaGold Glow Flies did the best. The early bite was in the top 50 feet of water and then deeper later in the morning.
