

## Deer Season

Thought I would post a picture of the deer I shot during the Michigan firearm season. I had been in my blind for almost 10 hours straight and was looking forward to heading back to camp when this guy chased a doe across in front of me. My hunting partner shot another nice buck two days later so the season was a complete success for us. I only had one license so I was forced to sleep in and hangout back at camp during the rest of my vacation. I did get out trolling on Manistee Lake a couple times and caught some nice steelhead with Tom who first mates for me in the summer. I have never hunted out of state but am going to join some friends down in Ohio after Thanksgiving next year. I am already looking forward to that trip.
