

## Monday, August 3, 2009

The wind and canceled trips have been the story here in Manistee. We did get out again on Sunday morning and found improved fishing. We hooked 9 or 10 fish but only landed half of them. The big white hootch with an Aquaglow fly was good as were the wire divers with small hootchies and Spin Dr's. Our biggest King came on a full core pulling a plug. We also took fish on our 90 foot rigger pulling a plug. We never got our spoons to go. There is a Gale Warning in affect though this evening. Hopefully we can get out in the morning. I continue to have issues with my cameras but will post a picture of Sundays catch once it is emailed to me.
